acomos™

Global hospitality
property management
software

Introducing your new PMS

acomos™ is global hospitality property management software designed with you in mind.

Our innovative hotel and asset software uses real-time inventory updates, channel management and digital marketing services to give you a unique insight into the management and performance of your hotel.

With simplicity and intelligence we can move you from your existing hotel software provider and with our service centre partner TOGIP™, provide unrivalled 24 hour, 7 days a week support to your staff.

If true hospitality is what you crave move over to acomos™ today.

Stay in front and stay booked.

Rate Management

How can acomos™ help?

Increase Revenue

- Manage your rates, occupancy and special offers automatically and through your own website, online travel agents and social media.

- Customise where your bookings are coming from with their own rate plans, billing formats and special notes.

Improve Service

- Save preferences for your guests, and add personalised notes to their account including special terms.

- Charge in room services, restaurant bookings and room rates all on one bill and keep accounts tidy using tracked purchases.

- Send personalised confirmations, welcome letters, text reminders and post-stay marketing to match your brand.

Simple Hotel Management

- Look after your guests from booking to departure from one single screen.

- Guest booking updates in one click drop downs.

- Create 'to do' lists for you and your colleagues to share updates and coordinate tasks.

Booking Engine

acomos™ PMS includes our direct booking engine, StayBooked™.

Allow your guests to access your hotel from anywhere in the world and receive commission-free bookings directly from your website.

StayBooked™ connects directly to the acomos™ PMS. When you receive a booking your inventory levels will be automatically updated on your PMS.

Your StayBooked™ website is also fully customisable. Personalise your booking engine with images and content to match your brand.

- Real-time availability
- Mobile-friendly
- Secure payment processing
- Global reach

Channel Manager

acomos™ offers full integration with Global Distribution Systems for seamless channel management.

Manage your inventory across online distribution channels with simplicity and accuracy.

The acomos™ channel manager is fully integrated with the acomos™ PMS to offer real-time availability and automatic inventory updates. Say goodbye to over-bookings and double-bookings.

Engineered with agility

Every hotel is unique and with this is a need for your software services to be agile.

As your hotel develops acomos™ is engineered to accommodate your changing business model with simple user interface functionality and minimum disruption.
