Introducing your new PMS

acomos™ is the most feature-rich, essential property management system on the market.

Our hotel management solution combines a robust SaaS property management system, commission-free booking engine and channel manager integration in one single system. We provide all the tools you need to successfully manage your hotel, including finance and reporting, email automation, housekeeping management, advanced rate plans, security and much more.

With simplicity and intelligence, our online wizard will guide you through a seamless set up of your PMS and our service centre, will provide unrivalled 24 hour, 7 days a week support to your staff.

If true hospitality is what you crave move over to acomos™ today.

Stay in front and stay booked.

Features

How can acomos help?

Increase Revenue

- Manage your rates, occupancy and special offers automatically and through your own website, online travel agents and social media.
- Customise where your bookings are coming from with their own rate plans, billing formats and special notes.

Improve Service

- Save preferences for your guests, and add personalised notes to their booking including special terms.
- Allow your guests to book online 24/7 with our commission-free booking engine.
- Send personalised confirmations, welcome letters, and post-stay marketing to match your brand.

Simple Hotel Management

- Take bookings in only 60 minutes with our online set-up wizard.
- Look after your guests from booking to departure from one single screen.
- Create guest booking updates in one click drop downs.
- Manage your housekeeping staff with real-time room updates.

Booking Engine

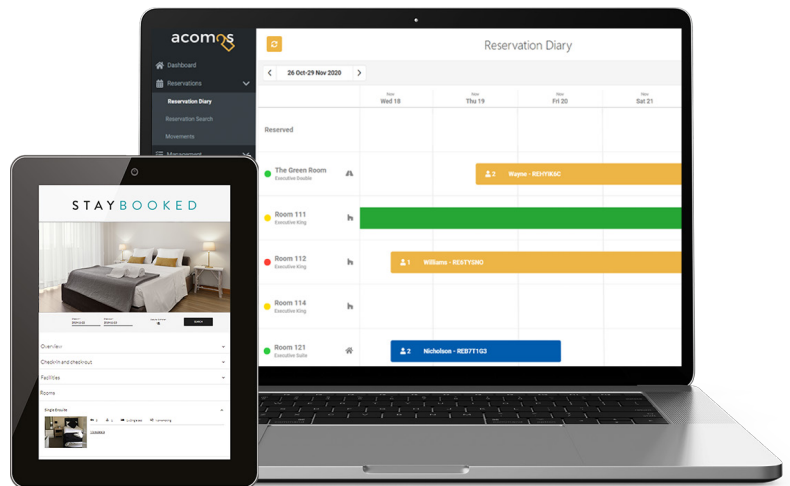

acomos™ PMS includes our direct booking engine, StayBooked™.

Allow your guests to access your hotel from anywhere in the world and receive commission-free bookings directly from your website.

StayBooked™ connects directly to the acomos™ PMS. When you receive a booking your inventory levels will be automatically updated on your PMS.

Your StayBooked™ website is also fully customisable. Personalise your booking engine with images and content to match your brand.

- Real-time availability
- Mobile-friendly
- Secure payment processing
- Global reach

Channel Manager

acomos™ offers full integration with Global Distribution Systems for seamless channel management.

We connect and share your inventory to over 400 bookings channels including Booking.com, Expedia, Airbnb and Hotelbeds, allowing you to manage your inventory with simplicity and accuracy.

Acomos™ provides a two-way integration with our preferred channel manager partner, to automatically update your availability and rates in real-time.

Engineered with agility

Every hotel is unique and with this is a need for your software services to be agile.

As your hotel develops acomos™ is engineered to accommodate your changing business model with simple user interface functionality and minimum disruption.
